NXXG
Next Generation Gloves

COMBINING LIQUID-PROOF CAPABILITY WITH FLEXIBILITY AND GRIP IS NO EASY FEAT – BUT THE NXXG CHEM GLOVE RANGE HAS DONE IT.

Chemical resistant gloves need to deliver a lot to the end user. They must be waterproof, flexible, and often need to incorporate cut resistant technology as well. After substantial laboratory and field testing, **NXXG** has created chemical resistant gloves that meet all these important features while remaining comfortable and fit for purpose. Workers can feel confident in the protection that these gloves provide in challenging situations.

FEATURES

- + Lightweight 18 gauge liner
- + Ergonomically shaped for best fit and comfort
- + Excellent grip in wet conditions
- + Soft and flexible coating reducing hand fatigue
- + 36cm length
- + Oeko-Tex® 100, Sanitized® and dermatologically accredited
- + Sizes 8 to 11

Why BSI Certification: By certifying with BSI, Safety Mate demonstrates to users of our products, that they not only use industry-respected best practices but also choose to work with the organization that developed many of these standards. As a highly trusted global regulator, BSI tests products against industry recognised standards. In a world where safety is of paramount importance, BSI and its logo offer additional value and guarantees that products have been expertly tested to market-leading standards of quality, safety and durability.

PRODUCT DISCLAIMER: Gloves that provide cut resistance are not cut-proof. The risk for these sorts of injuries will not be completely eliminated or prevented by the use of gloves. Cut resistant gloves are not intended to provide protection against powered rotated blades or equipment, serrated or other sharp or rotating equipment. It is the responsibility of companies and/ or glove users to perform their own testing to determine the suitability for a particular application or use within the environment the gloves are to be used. Safety Mate Pty Ltd may revise this information as new information, knowledge or experience becomes available. EN407 tests are performed on the palm part of gloves only.
